Subject Index

Volume 29, January-June 1997

A

ACE inhibition
Endothelin-1 Upregulation in the Kidney of Uninephrectomized Spontaneously Hypertensive Rats and Its Modification by the Angiotensin-Converting Enzyme Inhibitor Quinapril, 1178

ACE polymorphisms
Angiotensin-Converting Enzyme and Angiotensinogen Gene Polymorphisms, Plasma Levels, Cardiac Dimensions: A Twin Study, 165

Acetylcholine
Endogenous Estrogen and Acetylcholine-Induced Vasodilation in Normotensive Women, 268
Hypertension Causes Premature Aging of Endothelial Function in Humans, 736

Adaptation, psychological
Influence of Lifestyle, Coping, and Job Stress on Blood Pressure in Men and Women, 1

Adeno-associated viral vector
Antisense Inhibition and Adeno-Associated Viral Vector Delivery for Reducing Hypertension, 177

Adenylyl cyclase
G-Protein Function Is Reduced in Hypertension, 422

Adhesion molecules
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291

Adolescence
Long-term Effects of Neonatal Sodium Restriction on Blood Pressure, 913

Adrenal gland
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401
Dietary Salt Intake Modulates Angiotensin II Type 1 Receptor Gene Expression, 923

Adrenergic beta-antagonists
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744

Adrenoceptors
G-Protein Function Is Reduced in Hypertension, 422

Adrenomedullin
Adrenomedullin Is a Potent Inhibitor of Angiotensin II–Induced Migration of Human Coronary Artery Smooth Muscle Cells, 1309
Shear Stress Augments Expression of C-Type Natriuretic Peptide and Adrenomedullin, 1296

Afferent arteriole
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222

Afterload reduction
Combined Sympathetic Suppression and Angiotensin-Converting Enzyme Inhibition in Congestive Heart Failure, 525

Age
Age-Related Changes in Total Arterial Capacitance From Birth to Maturity in a Normotensive Population, 1213
Effects of Age on Ca^{2+} Currents in Small Mesenteric Artery Myocytes From Wistar-Kyoto and Spontaneously Hypertensive Rats, 1329
Relative Influence of Menopausal Status, Age, and Body Mass Index on Blood Pressure, 976

Aged
Association of Body Mass Index With Blood Pressure in Elderly Japanese American Men: The Honolulu Heart Program, 673
Ultrasonic Videodensitometric Analysis of Two Different Models of Left Ventricular Hypertrophy: Athlete's Heart and Hypertension, 937

Aging
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828
Hypertension Causes Premature Aging of Endothelial Function in Humans, 736
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067
Senescent Heart Compared With Pressure Overload–Induced Hypertrophy, 15

Air stress
Brain 'Ouabain' in the Median Preoptic Nucleus Mediates Sodium-Sensitive Hypertension in Spontaneously Hypertensive Rats, 599

Alcohol
Effects of Alcohol on Sympathetic Activity, Hemodynamics, and Chemoreflex Sensitivity, 1278

Aldosterone
Vascular Aldosterone in Genetically Hypertensive Rats, 45

Alzheimer's disease
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828

Amlodipine
Converting Enzyme Inhibitor Improves Forearm Reactive Hyperemia in Essential Hypertension, 286

Angiogenesis
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478

Angiotensin
Antisense Inhibition and Adeno-Associated Viral Vector Delivery for Reducing Hypertension, 177
Differential Alteration in Vascular Structure of Resistance Arteries Isolated From the Cerebral and Mesenteric Vascular Beds of Transgenic [(m*Ren-2*)27], Hypertensive Rats, 1140
Heme Oxygenase-1 Is Regulated by Angiotensin II in Rat Vascular Smooth Muscle Cells, 790
High Human Renin Hypertension in Transgenic Rats, 428
Mechanical Load Opposes Angiotensin-Mediated Decrease in Vascular α_1-Adrenoceptors, 1165
Prolonged Reduction of High Blood Pressure With an In Vivo, Nonpathogenic, Adeno-Associated Viral Vector Delivery of AT_1-R mRNA Antisense, 374
Renin-Angiotensin System Components in the Interstitial Fluid of the Isolated Perfused Rat Heart: Local Production of Angiotensin I, 1240
Sodium Intake, Angiotensin II Receptor Blockade, and Baroreflex Function in Conscious Rats, 450
Vascular Angiotensin-Converting Enzyme Expression Regulates Local Angiotensin II, 98

Angiotensin-(1-7)
Bovine Aortic Endothelial Cells Contain an Angiotensin-(1-7) Receptor, 388

Angiotensin antagonist
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401
Improvement in Baroreflex Function by an Oral Angiotensin Receptor Antagonist in Rats With Myocardial Infarction, 458

Angiotensin-converting enzyme
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Effects of Chronic Arterial Hypertension on Constitutive and Induced Intercellular Adhesion Molecule-1 Expression In Vivo, 683
Neonatal Angiotensin-Converting Enzyme Inhibition in the Rat Induces Persistent Abnormalities in Renal Function and Histology, 91
Vascular Angiotensin-Converting Enzyme Expression Regulates Local Angiotensin II, 98
Angiotensin-converting enzyme inhibition
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478
Influence of Nitric Oxide and Angiotensin II on Renal Involvement in Hypertension, 188
Angiotensin II
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Adrenomedullin Is a Potent Inhibitor of Angiotensin II–Induced Migration of Human Coronary Artery Smooth Muscle Cells, 1309
Age, Gender, and Non-modulation: A Sexual Dimorphism in Essential Hypertension, 980
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366
Bovine Aortic Endothelial Cells Contain an Angiotensin-(1-7) Receptor, 388
Effects of Chronic ET_A-Receptor Blockade in Angiotensin II–Induced Hypertension, 435
Expression of Guanylyl Cyclase-A/Atrial Natriuretic Peptide Receptor Blocks the Activation of Protein Kinase C in Vascular Smooth Muscle Cells: Role of cGMP and cGMP-Dependent Protein Kinase, 414
Increased Brain Transcription Factor Expression by Angiotensin in Genetic Hypertension, 592
Insulin-Induced Hypertension in Rats Depends on an Intact Renin-Angiotensin System, 1014
Intracellular Free Calcium Abnormalities in Fibroblasts From Non–Insulin-Dependent Diabetic Patients With and Without Arterial Hypertension, 1007
Opposite Regulation of Gax Homeobox Expression by Angiotensin II and C-Type Natriuretic Peptide, 381
Possible Participation of Nitric Oxide in the Increase of Norepinephrine Release Caused by Angiotensin Peptides in Rat Atria, 1344
Role of Renal Nerves in Afferent Arteriolar Reactivity in Angiotensin-Induced Hypertension, 442
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vasoconstriction in the Human Placenta, 796
Smooth Muscle Apoptosis During Vascular Regression in Spontaneously Hypertensive Rats, 340
Thromboxane Is Required for Full Expression of Angiotensin Hypertension in Rats, 310
Angiotensin II (antagonism and inhibition)
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Angiotensin peptides
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Hypothalamic Substance P Release: Attenuated Angiotensin Responses in mRen2(27) Transgenic Rats, 510
Angiotensin receptor subtypes
Bovine Aortic Endothelial Cells Contain an Angiotensin-(1-7) Receptor, 388
Angiotensinogen
Age, Gender, and Non-modulation: A Sexual Dimorphism in Essential Hypertension, 980
Angiotensinogen T235 Variant and the Use of Antihypertensive Drugs in a Population-Based Cohort, 628
Association of the Angiotensinogen Gene to Serum Angiotensinogen in Blacks and Whites, 1078
Dose Effects of Human Renin in Rats Transgenic for Human Angiotensinogen, 1031
Renin-Angiotensin System Components in the Interstitial Fluid of the Isolated Perfused Rat Heart: Local Production of Angiotensin I, 1240
Angiotensinogen genes
Association of the Angiotensinogen Gene to Serum Angiotensinogen in Blacks and Whites, 1078
Angiotensinogen polymorphisms
Angiotensin-Converting Enzyme and Angiotensinogen Gene Polymorphisms, Plasma Levels, Cardiac Dimensions: A Twin Study, 165
Anoxia
Effects of Alcohol on Sympathetic Activity, Hemodynamics, and Chemoreflex Sensitivity, 1278
Antihypertensive agents
Angiotensinogen T235 Variant and the Use of Antihypertensive Drugs in a Population-Based Cohort, 628
Blood Pressure Lowering for the Secondary Prevention of Myocardial Infarction and Stroke, 537
Converting Enzyme Inhibitor Improves Forearm Reactive Hyperemia in Essential Hypertension, 286
Long-term Effects on Sexual Function of Five Antihypertensive Drugs and Nutritional Hygienic Treatment in Hypertensive Men and Women: Treatment of Mild Hypertension Study (TOMHS), 8
Antioxidants
Heme Oxygenase-1 Is Regulated by Angiotensin II in Rat Vascular Smooth Muscle Cells, 790
Antiporters, sodium-calcium
Senescent Heart Compared With Pressure Overload–Induced Hypertrophy, 15
Antisense
Prolonged Reduction of High Blood Pressure With an In Vivo, Nonpathogenic, Adeno-Associated Viral Vector Delivery of AT_1-R mRNA Antisense, 374
Antisense oligodeoxynucleotide
Mitogen-Activated Protein Kinase Activation Is Involved in Platelet-Derived Growth Factor–Directed Migration by Vascular Smooth Muscle Cells, 334
Antisense oligonucleotide
Antisense Inhibition and Adeno-Associated Viral Vector Delivery for Reducing Hypertension, 177
Aorta
Aortic Changes in Experimental Renal Failure: Hyperplasia or Hypertrophy of Smooth Muscle Cells? 770
Chronic Dietary L-Arginine Prevents Endothelial Dysfunction Secondary to Environmental Tobacco Smoke in Normocholesterolemic Rabbits, 1186
Distinct Mechanisms of Modulation of Angiotensin II Type I Receptor Gene Expression in Heart and Aorta, 1104
Effects of Chronic ET_A-Receptor Blockade in Angiotensin II–Induced Hypertension, 435
Apoptosis
Cancer Risk in Users of Calcium Channel Blockers, 1091
Is the Regulation of Apoptosis Altered in Smooth Muscle Cells of Adult Spontaneously Hypertensive Rats? 776
Smooth Muscle Apoptosis During Vascular Regression in Spontaneously Hypertensive Rats, 340
Arachidonic acid
Vascular Smooth Muscle Thromboxane A_2 Receptors Mediate Arachidonic Acid–Induced Sudden Death in Rabbits, 303
Arginine
Chronic Dietary L-Arginine Prevents Endothelial Dysfunction Secondary to Environmental Tobacco Smoke in Normocholesterolemic Rabbits, 1186
Arterial pressure
Angiotensin II Enhances Baroreflex Control of Sympathetic Outflow in Heart Failure, 564

Role of Nitric Oxide in Modulating the Long-term Renal and Hypertensive Actions of Norepinephrine, 205
Role of Renal Nerves in Afferent Arteriolar Reactivity in Angiotensin-Induced Hypertension, 442

Arteries
Lack of Correlation Between Arterial and Venous β-Adrenergic Receptor Sensitivity, 1273

Arteriolar disease
Influence of Nitric Oxide and Angiotensin II on Renal Involvement in Hypertension, 188

Arterioles
Aberrant Renal Vascular Morphology and Renin Expression in Mutant Mice Lacking Angiotensin-Converting Enzyme, 216
Adrenomedullin Stimulates Renin Release and Renin mRNA in Mouse Juxtaglomerular Granular Cells, 1148
Estrogen Maintains Nitric Oxide Synthesis in Arterioles of Female Hypertensive Rats, 1351
Role of Renal Nerves in Afferent Arteriolar Reactivity in Angiotensin-Induced Hypertension, 442

Asian Americans
Association of Body Mass Index With Blood Pressure in Elderly Japanese American Men: The Honolulu Heart Program, 673

Association
Association of Body Mass Index With Blood Pressure in Elderly Japanese American Men: The Honolulu Heart Program, 673

Atenolol
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744

Atherosclerosis
Angiotensinogen Gene Variation Associated With Variation in Blood Pressure in Aboriginal Canadians, 1073
Association of Serum Antibodies to Heat-Shock Protein 65 With Borderline Hypertension, 40
Combined Effects of Hypertension and Hypercholesterolemia on Radial Artery Function, 583
Converting Enzyme Inhibitor Improves Forearm Reactive Hyperemia in Essential Hypertension, 286
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067

Autonomic nervous system
Baroreflex Impairment by Low Sodium Diet in Mild or Moderate Essential Hypertension, 802
Effects of Alcohol on Sympathetic Activity, Hemodynamics, and Chemoreflex Sensitivity, 1278

Autoregulation
Role of Renal Nerves in Afferent Arteriolar Reactivity in Angiotensin-Induced Hypertension, 442

B

Balloon injury
Induction of Renin in Medial Smooth Muscle Cells by Balloon Injury, 1044

Baroreceptors
Baroreflex Impairment by Low Sodium Diet in Mild or Moderate Essential Hypertension, 802
Differential Central Modulation of the Baroreflex by Salt Loading in Normotensive and Spontaneously Hypertensive Rats, 808

Baroreflex
ANP Enhances Bradycardic Reflexes in Normotensive but Not Spontaneously Hypertensive Rats, 1126
Baroreflex Control of Heart Rate and Cardiac Hypertrophy in Angiotensin II–Induced Hypertension in Rabbits, 1284
Baroreflex Sensitivity Assessed by Complex Demodulation of Cardiovascular Variability, 1119
Cardiopulmonary Baroreflex in NaCl-Induced Hypertension in Borderline Hypertensive Rats, 464
Improvement in Baroreflex Function by an Oral Angiotensin Receptor Antagonist in Rats With Myocardial Infarction, 458
Incremental Bias in Finapres Estimation of Baseline Blood Pressure Levels Over Time, 1039
Sodium Intake, Angiotensin II Receptor Blockade, and Baroreflex Function in Conscious Rats, 450
Sympathoexcitatory Response to Cyclosporin A and Baroreflex Resetting, 576

Biofeedback
Placebo-Controlled Biofeedback Blood Pressure Effect in Hypertensive Humans, 1225

Biological assay
FR 173657: A New, Potent, Nonpeptide Kinin B_2 Receptor Antagonist: An In Vitro Study, 951

Blacks
Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744
Preliminary Evidence of Linkage of Salt Sensitivity in Black Americans at the β_2-Adrenergic Receptor Locus, 918
Reduced Dietary Potassium Reversibly Enhances Vasopressor Response to Stress in African Americans, 1083

Blood flow, renal
Pressure Natriuresis and Renal Medullary Blood Flow in Dogs, 1051

Blood flow, skin
Calcium Channel Blockers Blunt Postural Cutaneous Vasoconstriction in Hypertensive Patients, 751

Blood pressure
Absence of Linkage for 'Endothelial' Nitric Oxide Synthase Locus to Blood Pressure in Dahl Rats, 49
Achievement and Safety of a Low Blood Pressure Goal in Chronic Renal Disease: The Modification of Diet in Renal Disease Study Group, 641
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Amplification of Kinin-Induced Hypotension by Nitric Oxide Synthesis in Spontaneously Hypertensive Rats, 53
Association of Body Mass Index With Blood Pressure in Elderly Japanese American Men: The Honolulu Heart Program, 673
Association of the Angiotensinogen Gene to Serum Angiotensinogen in Blacks and Whites, 1078
Asymmetrical Dimethylarginine, an Endogenous Nitric Oxide Synthase Inhibitor, in Experimental Hypertension, 242
Baroreflex Control of Heart Rate and Cardiac Hypertrophy in Angiotensin II–Induced Hypertension in Rabbits, 1284
Blood Pressure Lowering for the Secondary Prevention of Myocardial Infarction and Stroke, 537
Calcitonin Gene–Related Peptide Is a Depressor of Deoxycorticosterone-Salt Hypertension in the Rat, 945
Cardiovascular Effects of Anandamide in Anesthetized and Conscious Normotensive and Hypertensive Rats, 1204
Characteristics of Diabetes, Blood Pressure, and Cardiac and Renal Complications in Otsuka Long-Evans Tokushima Fatty Rats, 728
Contrasting Autonomic and Hemodynamic Effects of Insulin in Healthy Elderly Versus Young Subjects, 700
Determining the Trough-to-Peak Ratio in Parallel-Group Trials, 659
Differential Human Renal Tubular Responses to Dopamine Type 1 Receptor Stimulation Are Determined by Blood Pressure Status, 115
Effects of Alcohol on Sympathetic Activity, Hemodynamics, and Chemoreflex Sensitivity, 1278
Effects of Subfornical Organ Lesions on Sympathetic Nerve Responses to Insulin, 1020
Influence of Lifestyle, Coping, and Job Stress on Blood Pressure in Men and Women, 1
Insulin-Induced Hypertension in Rats Depends on an Intact Renin-Angiotensin System, 1014

Kallikrein-Kinin System and Blood Pressure Sensitivity to Salt, 471
Left Ventricular Mass in the Elderly: The Cardiovascular Health Study, 1095
Long-term Effects of Neonatal Sodium Restriction on Blood Pressure, 913
Nifedipine Attenuates Systemic and Renal Vasoconstriction During Nitric Oxide Inhibition in Humans, 1192
Nocturnal Blood Pressure Fall on Ambulatory Monitoring in a Large International Database, 30
Nutrient Intake and Blood Pressure in the Dietary Intervention Study in Children, 930
Pressor Effects of Endogenous Opioid System During Acute Episodes of Blood Pressure Increases in Hypertensive Patients, 105
Relative Influence of Menopausal Status, Age, and Body Mass Index on Blood Pressure, 976
Spontaneously Hypertensive Rat Y Chromosome Increases Indexes of Sympathetic Nervous System Activity, 613
Thromboxane Is Required for Full Expression of Angiotensin Hypertension in Rats, 310

Blood pressure monitoring
Incremental Bias in Finapres Estimation of Baseline Blood Pressure Levels Over Time, 1039
Placebo-Controlled Biofeedback Blood Pressure Effect in Hypertensive Humans, 1225
Prediction of Cardiac Structure and Function by Repeated Clinic and Ambulatory Blood Pressure, 22

Blood pressure monitoring, ambulatory
Confirmation or Exclusion of Stage I Hypertension by Ambulatory Blood Pressure Monitoring, 1109
Determining the Trough-to-Peak Ratio in Parallel-Group Trials, 659
Nocturnal Blood Pressure Fall on Ambulatory Monitoring in a Large International Database, 30
Prognostic Significance of the White Coat Effect, 1218

Blood vessels
Blood Pressure and Vascular Effects of Endothelin Blockade in Chronic Nitric Oxide–Deficient Hypertension, 763
FR 173657: A New, Potent, Nonpeptide Kinin B_2 Receptor Antagonist: An In Vitro Study, 951

Blotting, Northern
Regulation of Growth of the Adrenal Gland in DOC-Salt Hypertension: Role of Angiotensin II Receptor Subtypes, 408

Body constitution
Age-Related Changes in Total Arterial Capacitance From Birth to Maturity in a Normotensive Population, 1213

Body mass
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171

Body mass index
Association of Body Mass Index With Blood Pressure in Elderly Japanese American Men: The Honolulu Heart Program, 673
Relative Influence of Menopausal Status, Age, and Body Mass Index on Blood Pressure, 976

Book review
Clinical and Experimental Pheochromocytoma, 1064
Endocrinology of the Vasculature, 1064

Bradykinin
Amplification of Kinin-Induced Hypotension by Nitric Oxide Synthesis in Spontaneously Hypertensive Rats, 53
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478
Bradykinin B_2 Receptor Modulates Renal Prostaglandin E_2 and Nitric Oxide, 757
Effect of High Salt Intake in Mutant Mice Lacking Bradykinin-B_2 Receptors, 483
Intracellular Free Calcium Abnormalities in Fibroblasts From Non–Insulin-Dependent Diabetic Patients With and Without Arterial Hypertension, 1007

Bradykinin antagonist
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478

Bradykinin B_2 receptor knockout mouse
Effect of High Salt Intake in Mutant Mice Lacking Bradykinin-B_2 Receptors, 483

Brain
Increased Brain Transcription Factor Expression by Angiotensin in Genetic Hypertension, 592

Brain natriuretic peptide
Urinary Endothelin-1 Excretion Is Enhanced by Low-Dose Infusion of Brain Natriuretic Peptide in Normal Humans, 70

C

Ca^{2+}-transporting ATPase
Hypothalamic Hypophyseal Inhibitory Factor (HHIF) Increases Intrasynaptosomal Free Calcium Concentration, 1337
Senescent Heart Compared With Pressure Overload–Induced Hypertrophy, 15

Calcitonin gene–related peptide
Calcitonin Gene–Related Peptide Is a Depressor in N^G-Nitro-L-Arginine Methyl Ester–Induced Hypertension During Pregnancy, 248
Calcitonin Gene–Related Peptide Is a Depressor of Deoxycorticosterone-Salt Hypertension in the Rat, 945

Calcium
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999
Effects of Dietary Sodium and Magnesium on Cyclosporin A–Induced Hypertension and Nephrotoxicity in Spontaneously Hypertensive Rats, 822

Calcium channel blockers
Calcium Channel Blockers Blunt Postural Cutaneous Vasoconstriction in Hypertensive Patients, 751
Cancer Risk in Users of Calcium Channel Blockers, 1091
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744
Nifedipine Attenuates Systemic and Renal Vasoconstriction During Nitric Oxide Inhibition in Humans, 1192
Pressure Natriuresis and Renal Medullary Blood Flow in Dogs, 1051
Smooth Muscle Apoptosis During Vascular Regression in Spontaneously Hypertensive Rats, 340

Calcium channels
Effects of Age on Ca^{2+} Currents in Small Mesenteric Artery Myocytes From Wistar-Kyoto and Spontaneously Hypertensive Rats, 1329

Calcium mobilization
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222

Calcium supplements
Oral Calcium Supplementation Reduces Intraplatelet Free Calcium Concentration and Insulin Resistance in Essential Hypertensive Patients, 531

Calcium, intracellular
Intracellular Free Calcium Abnormalities in Fibroblasts From Non–Insulin-Dependent Diabetic Patients With and Without Arterial Hypertension, 1007

Cannabinoids
Cardiovascular Effects of Anandamide in Anesthetized and Conscious Normotensive and Hypertensive Rats, 1204

Capillary density
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478

Captopril
Combined Sympathetic Suppression and Angiotensin-Converting Enzyme Inhibition in Congestive Heart Failure, 525
Distinct Mechanisms of Modulation of Angiotensin II Type I Receptor Gene Expression in Heart and Aorta, 1104
Carbon monoxide
Neural Circulatory Responses to Carbon Monoxide in Healthy Humans, 1114
Carboxyhemoglobin
Neural Circulatory Responses to Carbon Monoxide in Healthy Humans, 1114
Cardiac glycosides
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401
Cardiac hypertrophy
Angiotensin-Converting Enzyme and Angiotensinogen Gene Polymorphisms, Plasma Levels, Cardiac Dimensions: A Twin Study, 165
Carotid artery, common
Mechanical Stress of the Carotid Artery at the Early Phase of Spontaneous Hypertension in Rats, 992
Catecholamines
Adrenomedullary Secretion of Epinephrine Is Increased in Mild Essential Hypertension, 1303
Pressor Effects of Endogenous Opioid System During Acute Episodes of Blood Pressure Increases in Hypertensive Patients, 105
Tumor Recurrence and Hypertension Persistence After Successful Pheochromocytoma Operation, 1133
Cell movement
Adrenomedullin Is a Potent Inhibitor of Angiotensin II–Induced Migration of Human Coronary Artery Smooth Muscle Cells, 1309
Cell proliferation
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322
Central hypertonic saline
Brain 'Ouabain' in the Median Preoptic Nucleus Mediates Sodium-Sensitive Hypertension in Spontaneously Hypertensive Rats, 599
Central nervous system
Differential Central Modulation of the Baroreflex by Salt Loading in Normotensive and Spontaneously Hypertensive Rats, 808
Cerebrovascular disorders
Blood Pressure Lowering for the Secondary Prevention of Myocardial Infarction and Stroke, 537
cGMP
Expression of Guanylyl Cyclase-A/Atrial Natriuretic Peptide Receptor Blocks the Activation of Protein Kinase C in Vascular Smooth Muscle Cells: Role of cGMP and cGMP-Dependent Protein Kinase, 414
CGP42112
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401
Child nutrition
Nutrient Intake and Blood Pressure in the Dietary Intervention Study in Children, 930
Cholecalciferol
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999
Cholesterol
Cholesterol Enhances Platelet-Derived Growth Factor-BB–Induced $[CA^{2+}]_i$ and DNA Synthesis in Rat Aortic Smooth Muscle Cells, 326
Chromogranin A
Spontaneously Hypertensive Rat Y Chromosome Increases Indexes of Sympathetic Nervous System Activity, 613
Chromosomes
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067
Circadian rhythm
Nocturnal Blood Pressure Fall on Ambulatory Monitoring in a Large International Database, 30
Clinical conference
Insulin and Insulin-Like Growth Factor in Normal and Pathological Cardiovascular Physiology, 691
Clinical trials
Determining the Trough-to-Peak Ratio in Parallel-Group Trials, 659
Different Concepts in First-Line Treatment of Essential Hypertension: Comparison of a Low-Dose Reserpine-Thiazide Combination With Nitrendipine Monotherapy, 651
Clonidine
Combined Sympathetic Suppression and Angiotensin-Converting Enzyme Inhibition in Congestive Heart Failure, 525
Clopamid
Different Concepts in First-Line Treatment of Essential Hypertension: Comparison of a Low-Dose Reserpine-Thiazide Combination With Nitrendipine Monotherapy, 651
Cohort studies
Cancer Risk in Users of Calcium Channel Blockers, 1091
Cold
Reduced Dietary Potassium Reversibly Enhances Vasopressor Response to Stress in African Americans, 1083
Combination therapy
Different Concepts in First-Line Treatment of Essential Hypertension: Comparison of a Low-Dose Reserpine-Thiazide Combination With Nitrendipine Monotherapy, 651
Complex demodulation
Baroreflex Sensitivity Assessed by Complex Demodulation of Cardiovascular Variability, 1119
Complex traits
Genetically Complex Cardiovascular Traits: Origins, Problems, and Potential Solutions, 145
Compliance
Age-Related Changes in Total Arterial Capacitance From Birth to Maturity in a Normotensive Population, 1213
Combined Effects of Hypertension and Hypercholesterolemia on Radial Artery Function, 583
Congenic strain
Transfer of a Salt-Resistant Renin Allele Raises Blood Pressure in Dahl Salt-Sensitive Rats, 619
Coronary artery
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Regulation of Potassium Channels in Coronary Arterial Smooth Muscle by Endothelium-Derived Vasodilators, 262
Coronary artery disease
Safety and Feasibility of Dobutamine-Atropine Stress Testing in Hypertensive Patients, 1232
Coronary circulation
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Cyclic AMP
Dopamine D_{1A} Receptors and Renin Release in Rat Juxtaglomerular Cells, 962
Cyclic GMP
Bradykinin B_2 Receptor Modulates Renal Prostaglandin E_2 and Nitric Oxide, 757
Relationship Between Insulin Resistance and Endothelium-Dependent Vascular Relaxation in Patients With Essential Hypertension, 280
Selective Guanylyl Cyclase Inhibitor Reverses Nitric Oxide–Induced Vasorelaxation, 254
Cyclooxygenase
Cyclooxygenase-2 Mediates Increased Renal Renin Content Induced by Low-Sodium Diet, 297
Cyclosporine
Cyclosporin A Increases Nitric Oxide Activity In Vivo, 570
Cyclosporine Impairs the Ability of Human Platelets to Mediate Vasodilation, 1314
Effects of Dietary Sodium and Magnesium on Cyclosporin A–Induced Hypertension and Nephrotoxicity in Spontaneously Hypertensive Rats, 822

Sympathoexcitatory Response to Cyclosporin A and Baroreflex Resetting, 576
Cytochrome P450
Inhibition of Renal Outer Medullary 20-HETE Production Produces Hypertension in Lewis Rats, 315
Cytogenetics
Role of the α-, β-, and γ-Subunits of Epithelial Sodium Channel in a Model of Polygenic Hypertension, 131
Cytosolic calcium
Linkage Analysis Using Platelet-Activating Factor Ca^{2+} Response in Transformed Lymphoblasts, 158

D

Deoxycorticosterone
Regulation of Growth of the Adrenal Gland in DOC-Salt Hypertension: Role of Angiotensin II Receptor Subtypes, 408
Desensitization, adrenergic
Role of Nitric Oxide in the Development of Vascular α_1-Adrenoreceptor Desensitization and Pressure Diuresis in Conscious Rats, 969
Desmosine
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999
Desoxycorticosterone
Receptor Subtype for Vasopressin-Induced Release of Nitric Oxide From Rat Kidney, 58
Diabetes mellitus
Characteristics of Diabetes, Blood Pressure, and Cardiac and Renal Complications in Otsuka Long-Evans Tokushima Fatty Rats, 728
Metformin Inhibits Ganglionic Neurotransmission in Renal Nerves, 1173
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067
Diabetes mellitus, experimental
Effects of Enalapril, Losartan, and Verapamil on Blood Pressure and Glucose Metabolism in the Cohen-Rosenthal Diabetic Hypertensive Rat, 1260
Diabetes, non–insulin-dependent
Intracellular Free Calcium Abnormalities in Fibroblasts From Non–Insulin-Dependent Diabetic Patients With and Without Arterial Hypertension, 1007
Diabetic nephropathies
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744
Diastolic function
Left Ventricular Filling in Arterial Hypertension: Influence of Obesity and Hemodynamic and Structural Confounders, 544
Diet
Nutrient Intake and Blood Pressure in the Dietary Intervention Study in Children, 930
Diet, low sodium
Baroreflex Impairment by Low Sodium Diet in Mild or Moderate Essential Hypertension, 802
Digitalis-like factor
Sodium Pump Isoform Specificity for the Digitalis-Like Factor Isolated From Human Peritoneal Dialysate, 815
Diuresis
Role of Nitric Oxide in the Development of Vascular α_1-Adrenoreceptor Desensitization and Pressure Diuresis in Conscious Rats, 969
Dobutamine
Safety and Feasibility of Dobutamine-Atropine Stress Testing in Hypertensive Patients, 1232
DOC-salt hypertension
Gonadal Hormones Modulate Deoxycorticosterone-Salt Hypertension in Male and Female Rats, 494
Dog
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Dopamine
Dopamine D1–Like Receptor Stimulation Inhibits Hypertrophy Induced by Platelet-Derived Growth Factor in Cultured Rat Renal Vascular Smooth Muscle Cells, 350
Intrarenal Dopamine Production and Distribution in the Rat: Physiological Control of Sodium Excretion, 228
Dopamine agonists
Differential Human Renal Tubular Responses to Dopamine Type 1 Receptor Stimulation Are Determined by Blood Pressure Status, 115
Doxorubicin
Pregnancy-Induced Hypertension in Rats With Adriamycin Nephropathy Is Associated With an Inadequate Production of Nitric Oxide, 986
Drug synergism
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Drugs, antihypertensive
Achievement and Safety of a Low Blood Pressure Goal in Chronic Renal Disease: The Modification of Diet in Renal Disease Study Group, 641
DuP753
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401

E

Echocardiography
High Prevalence of Concentric Remodeling in Elderly Individuals With Isolated Systolic Hypertension From a Population Survey, 539
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361

Left Ventricular Mass in the Elderly: The Cardiovascular Health Study, 1095
Limited Echocardiography for Hypertensive Left Ventricular Hypertrophy, 560
Mechanisms of Coronary Flow Reserve Impairment in Human Hypertension: An Integrated Approach by Transthoracic and Transesophageal Echocardiography, 551
Prediction of Cardiac Structure and Function by Repeated Clinic and Ambulatory Blood Pressure, 22
Safety and Feasibility of Dobutamine-Atropine Stress Testing in Hypertensive Patients, 1232
Ultrasonic Videodensitometric Analysis of Two Different Models of Left Ventricular Hypertrophy: Athlete's Heart and Hypertension, 937
Echotracking techniques
Mechanical Stress of the Carotid Artery at the Early Phase of Spontaneous Hypertension in Rats, 992
Edema, ankle
Calcium Channel Blockers Blunt Postural Cutaneous Vasoconstriction in Hypertensive Patients, 751
Editorial
Blood Pressure Lowering for the Secondary Prevention of Myocardial Infarction and Stroke, 537
Efferent arteriole
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222
Eicosanoids
Inhibition of Renal Outer Medullary 20-HETE Production Produces Hypertension in Lewis Rats, 315
Elasticity
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999
Elderly
Contrasting Autonomic and Hemodynamic Effects of Insulin in Healthy Elderly Versus Young Subjects, 700

Enalapril
Effects of Enalapril, Losartan, and Verapamil on Blood Pressure and Glucose Metabolism in the Cohen-Rosenthal Diabetic Hypertensive Rat, 1260
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Endothelial cells
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291
Endothelial factors
Role of Nitric Oxide in Modulating the Long-term Renal and Hypertensive Actions of Norepinephrine, 205
Endothelial function
Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706
Endothelin-1
Endothelin-1 Upregulation in the Kidney of Uninephrectomized Spontaneously Hypertensive Rats and Its Modification by the Angiotensin-Converting Enzyme Inhibitor Quinapril, 1178
Pressor Effects of Endogenous Opioid System During Acute Episodes of Blood Pressure Increases in Hypertensive Patients, 105
Urinary Endothelin-1 Excretion Is Enhanced by Low-Dose Infusion of Brain Natriuretic Peptide in Normal Humans, 70
Endothelins
Blood Pressure and Vascular Effects of Endothelin Blockade in Chronic Nitric Oxide–Deficient Hypertension, 763
Effects of Chronic ET_A-Receptor Blockade in Angiotensin II–Induced Hypertension, 435
Endothelium
Bovine Aortic Endothelial Cells Contain an Angiotensin-(1-7) Receptor, 388
Chronic Dietary L-Arginine Prevents Endothelial Dysfunction Secondary to Environmental Tobacco Smoke in Normocholesterolemic Rabbits, 1186
Cyclooxygenase Inhibition Restores Nitric Oxide Activity in Essential Hypertension, 274
Cyclosporine Impairs the Ability of Human Platelets to Mediate Vasodilation, 1314
Effects of Chronic Arterial Hypertension on Constitutive and Induced Intercellular Adhesion Molecule-1 Expression In Vivo, 683
Effects of Chronic ET_A-Receptor Blockade in Angiotensin II–Induced Hypertension, 435
Endogenous Estrogen and Acetylcholine-Induced Vasodilation in Normotensive Women, 268
Hypertension Causes Premature Aging of Endothelial Function in Humans, 736
Influence of Nitric Oxide and Angiotensin II on Renal Involvement in Hypertension, 188
Insulin and Insulin-Like Growth Factor in Normal and Pathological Cardiovascular Physiology, 691
Link Among Nitric Oxide Synthase Activity, Endothelial Function, and Aortic and Ventricular Hypertrophy in Hypertension, 235
Receptor Subtype for Vasopressin-Induced Release of Nitric Oxide From Rat Kidney, 58
Regulation of Potassium Channels in Coronary Arterial Smooth Muscle by Endothelium-Derived Vasodilators, 262
Shear Stress Augments Expression of C-Type Natriuretic Peptide and Adrenomedullin, 1296
Thrombin Inhibits Atrial Natriuretic Peptide Receptor Activity in Cultured Bovine Endothelial Cells, 83
Endothelium-derived factors
Amplification of Kinin-Induced Hypotension by Nitric Oxide Synthesis in Spontaneously Hypertensive Rats, 53
Cyclooxygenase Inhibition Restores Nitric Oxide Activity in Essential Hypertension, 274
N-Acetylcysteine Does Not Influence the Activity of Endothelium-Derived Relaxing Factor In Vivo, 668
Selective Guanylyl Cyclase Inhibitor Reverses Nitric Oxide–Induced Vasorelaxation, 254
Endothelium-derived relaxing factors
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Enzymes
Inhibition of 20-HETE Production Contributes to the Vascular Responses to Nitric Oxide, 320
Epidemiology
Cancer Risk in Users of Calcium Channel Blockers, 1091
Epinephrine
Adrenomedullary Secretion of Epinephrine Is Increased in Mild Essential Hypertension, 1303
Epitope mapping
α_1-Adrenergic Receptor Antibodies in Patients With Primary Hypertension, 678
Epoxyeicosatrienoic acids
Regulation of Potassium Channels in Coronary Arterial Smooth Muscle by Endothelium-Derived Vasodilators, 262
Estradiol
Estrogen Maintains Nitric Oxide Synthesis in Arterioles of Female Hypertensive Rats, 1351
Estrogen
Endogenous Estrogen and Acetylcholine-Induced Vasodilation in Normotensive Women, 268
ET receptors
Effects of Chronic ET_A-Receptor Blockade in Angiotensin II–Induced Hypertension, 435
Evolution
Genetically Complex Cardiovascular Traits: Origins, Problems, and Potential Solutions, 145
Exercise
Region-Specific Neuropeptide Y Overflows at Rest and During Sympathetic Activation in Humans, 137

Left Ventricular Filling in Arterial Hypertension: Influence of Obesity and Hemodynamic and Structural Confounders, 544
Mechanisms of Coronary Flow Reserve Impairment in Human Hypertension: An Integrated Approach by Transthoracic and Transesophageal Echocardiography, 551
Hypertension, borderline
Association of Serum Antibodies to Heat-Shock Protein 65 With Borderline Hypertension, 40
Hypertension, essential
α_1-Adrenergic Receptor Antibodies in Patients With Primary Hypertension, 678
Adrenomedullary Secretion of Epinephrine Is Increased in Mild Essential Hypertension, 1303
Angiotensinogen T235 Variant and the Use of Antihypertensive Drugs in a Population-Based Cohort, 628
Calcium Channel Blockers Blunt Postural Cutaneous Vasoconstriction in Hypertensive Patients, 751
Cyclooxygenase Inhibition Restores Nitric Oxide Activity in Essential Hypertension, 274
Different Concepts in First-Line Treatment of Essential Hypertension: Comparison of a Low-Dose Reserpine-Thiazide Combination With Nitrendipine Monotherapy, 651
Essential Hypertension Is Associated With Decreased Insulin Clearance and Insulin Resistance, 111
Hypertension Causes Premature Aging of Endothelial Function in Humans, 736
Increased Membrane Ratios of Metabolite to Precursor Fatty Acid in Essential Hypertension, 1058
Increased Na^+-H^+ Exchange in Red Blood Cells of Patients With Primary Aldosteronism, 587
Left Ventricular Hypertrophy Precedes Other Target-Organ Damage in Primary Aldosteronism, 723
Pulsatile Compression of the Rostral Ventrolateral Medulla in Hypertension, 514
Relationship Between Insulin Resistance and Endothelium-Dependent Vascular Relaxation in Patients With Essential Hypertension, 280
Hypertension, experimental
Blood Pressure and Vascular Effects of Endothelin Blockade in Chronic Nitric Oxide–Deficient Hypertension, 763
Calcitonin Gene–Related Peptide Is a Depressor of Deoxycorticosterone-Salt Hypertension in the Rat, 945
High Human Renin Hypertension in Transgenic Rats, 428
Role of Substance P in Blood Pressure Regulation in Salt-Dependent Experimental Hypertension, 506
Sympathoexcitatory Response to Cyclosporin A and Baroreflex Resetting, 576
Hypertension, genetic
Absence of Linkage for 'Endothelial' Nitric Oxide Synthase Locus to Blood Pressure in Dahl Rats, 49
Preliminary Evidence of Linkage of Salt Sensitivity in Black Americans at the β_2-Adrenergic Receptor Locus, 918
Hypertension, reduced renal mass
Distinct Mechanisms of Modulation of Angiotensin II Type I Receptor Gene Expression in Heart and Aorta, 1104
Hypertension, renal
Induction of Growth Hormone Receptor and Insulin-Like Growth Factor-I mRNA in Aorta and Caval Vein During Hemodynamic Challenge, 123
Hypertension, renovascular
Time Course Changes of the Mechanical Properties of the Carotid Artery in Renal Hypertensive Rats, 1199
Two-Kidney, One Clip and One-Kidney, One Clip Hypertension in Mice, 1025
Vascular Angiotensin-Converting Enzyme Expression Regulates Local Angiotensin II, 98
Hypertension, sodium-dependent
Pressure Natriuresis in Salt-Sensitive and Salt-Resistant Sabra Rats, 1252
Hypertension, systolic
High Prevalence of Concentric Remodeling in Elderly Individuals With Isolated Systolic Hypertension From a Population Survey, 539
Hypertension, white coat
Increased Membrane Ratios of Metabolite to Precursor Fatty Acid in Essential Hypertension, 1058
Prognostic Significance of the White Coat Effect, 1218
Hypertrophy
Cardiac β-Adrenoceptor–Mediated Signaling Pathway and Its Alterations in Hypertensive Heart Disease, 715

Differential Alteration in Vascular Structure of Resistance Arteries Isolated From the Cerebral and Mesenteric Vascular Beds of Transgenic [(m*Ren-2*)27], Hypertensive Rats, 1140
Dopamine D1–Like Receptor Stimulation Inhibits Hypertrophy Induced by Platelet-Derived Growth Factor in Cultured Rat Renal Vascular Smooth Muscle Cells, 350
High Human Renin Hypertension in Transgenic Rats, 428
High Prevalence of Concentric Remodeling in Elderly Individuals With Isolated Systolic Hypertension From a Population Survey, 539
Left Ventricular Filling in Arterial Hypertension: Influence of Obesity and Hemodynamic and Structural Confounders, 544
Mechanical Stress of the Carotid Artery at the Early Phase of Spontaneous Hypertension in Rats, 992
Mechanisms of Coronary Flow Reserve Impairment in Human Hypertension: An Integrated Approach by Transthoracic and Transesophageal Echocardiography, 551
Time Course Changes of the Mechanical Properties of the Carotid Artery in Renal Hypertensive Rats, 1199
Two-Kidney, One Clip and One-Kidney, One Clip Hypertension in Mice, 1025

Hypertrophy, left ventricular
Baroreflex Control of Heart Rate and Cardiac Hypertrophy in Angiotensin II–Induced Hypertension in Rabbits, 1284
Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706
Effects of Dietary Sodium and Magnesium on Cyclosporin A–Induced Hypertension and Nephrotoxicity in Spontaneously Hypertensive Rats, 822
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361
Left Ventricular Hypertrophy Precedes Other Target-Organ Damage in Primary Aldosteronism, 723
Limited Echocardiography for Hypertensive Left Ventricular Hypertrophy, 560
Link Among Nitric Oxide Synthase Activity, Endothelial Function, and Aortic and Ventricular Hypertrophy in Hypertension, 235
Prediction of Cardiac Structure and Function by Repeated Clinic and Ambulatory Blood Pressure, 22

Hypotension
Cardiovascular Effects of Anandamide in Anesthetized and Conscious Normotensive and Hypertensive Rats, 1204
Hypotension in Transgenic Mice Overexpressing Human Bradykinin B_2 Receptor, 488

Hypothalamo-hypophyseal system
Sympathoexcitatory Effect of Hypothalamic/ Hypophysary Inhibitory Factor in Rats, 1291

Hypothalamus
Hypothalamic Substance P Release: Attenuated Angiotensin Responses in mRen2(27) Transgenic Rats, 510

Hypoxia
Hypoxia Stimulates Atrial Natriuretic Peptide Gene Expression in Cultured Atrial Cardiocytes, 75

I

ICAM
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291

Immune system
α_1-Adrenergic Receptor Antibodies in Patients With Primary Hypertension, 678

Immunoglobulins, Fab
Sympathoexcitatory Effect of Hypothalamic/ Hypophysary Inhibitory Factor in Rats, 1291

Immunohistochemistry
Dopamine D_{1A} Receptors and Renin Release in Rat Juxtaglomerular Cells, 962

Impotence
Long-term Effects on Sexual Function of Five Antihypertensive Drugs and Nutritional Hygienic Treatment in Hypertensive Men and Women: Treatment of Mild Hypertension Study (TOMHS), 8

In situ hybridization, fluorescence
Role of the α-, β-, and γ-Subunits of Epithelial Sodium Channel in a Model of Polygenic Hypertension, 131

Indomethacin
Cyclooxygenase Inhibition Restores Nitric Oxide Activity in Essential Hypertension, 274

Infant nutrition
Long-term Effects of Neonatal Sodium Restriction on Blood Pressure, 913

Insulin
Angiotensinogen Gene Variation Associated With Variation in Blood Pressure in Aboriginal Canadians, 1073
Contrasting Autonomic and Hemodynamic Effects of Insulin in Healthy Elderly Versus Young Subjects, 700
Effects of Subfornical Organ Lesions on Sympathetic Nerve Responses to Insulin, 1020
Essential Hypertension Is Associated With Decreased Insulin Clearance and Insulin Resistance, 111
Insulin and Insulin-Like Growth Factor in Normal and Pathological Cardiovascular Physiology, 691
Insulin-Induced Hypertension in Rats Depends on an Intact Renin-Angiotensin System, 1014

Insulin-like growth factor I
Induction of Growth Hormone Receptor and Insulin-Like Growth Factor-I mRNA in Aorta and Caval Vein During Hemodynamic Challenge, 123
Insulin and Insulin-Like Growth Factor in Normal and Pathological Cardiovascular Physiology, 691

Insulin resistance
Essential Hypertension Is Associated With Decreased Insulin Clearance and Insulin Resistance, 111
Oral Calcium Supplementation Reduces Intraplatelet Free Calcium Concentration and Insulin Resistance in Essential Hypertensive Patients, 531
Relationship Between Insulin Resistance and Endothelium-Dependent Vascular Relaxation in Patients With Essential Hypertension, 280

Integrins
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291

Interleukin-1
Endothelin-1 Inhibits Nitric Oxide Synthesis in Vascular Smooth Muscle Cells, 65

Interstitium
Bradykinin B_2 Receptor Modulates Renal Prostaglandin E_2 and Nitric Oxide, 757

Intima
Induction of Renin in Medial Smooth Muscle Cells by Balloon Injury, 1044

Intracellular free calcium
Oral Calcium Supplementation Reduces Intraplatelet Free Calcium Concentration and Insulin Resistance in Essential Hypertensive Patients, 531

Ion exchange
Hypothalamic Hypophyseal Inhibitory Factor (HHIF) Increases Intrasynaptosomal Free Calcium Concentration, 1337

Ion transport
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322

Isoproterenol
Lack of Correlation Between Arterial and Venous β-Adrenergic Receptor Sensitivity, 1273

K

Kallikrein-kinin system
Effect of High Salt Intake in Mutant Mice Lacking Bradykinin-B_2 Receptors, 483

Kidney
Aberrant Renal Vascular Morphology and Renin Expression in Mutant Mice Lacking Angiotensin-Converting Enzyme, 216
Adrenomedullin Stimulates Renin Release and Renin mRNA in Mouse Juxtaglomerular Granular Cells, 1148
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222
Bradykinin B_2 Receptor Modulates Renal Prostaglandin E_2 and Nitric Oxide, 757
Dietary Salt Intake Modulates Angiotensin II Type 1 Receptor Gene Expression, 923
Endothelin-1 Upregulation in the Kidney of Uninephrectomized Spontaneously Hypertensive Rats and Its Modification by the Angiotensin-Converting Enzyme Inhibitor Quinapril, 1178
Inhibition of Renal Outer Medullary 20-HETE Production Produces Hypertension in Lewis Rats, 315
Intrarenal Dopamine Production and Distribution in the Rat: Physiological Control of Sodium Excretion, 228
Neonatal Angiotensin-Converting Enzyme Inhibition in the Rat Induces Persistent Abnormalities in Renal Function and Histology, 91
Nitric Oxide in Renal Cortex and Medulla: An In Vivo Microdialysis Study, 194
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067
Role of Nitric Oxide in Modulating the Long-term Renal and Hypertensive Actions of Norepinephrine, 205
Urinary Endothelin-1 Excretion Is Enhanced by Low-Dose Infusion of Brain Natriuretic Peptide in Normal Humans, 70
Kidney failure
Aortic Changes in Experimental Renal Failure: Hyperplasia or Hypertrophy of Smooth Muscle Cells? 770
Kidney tubules, proximal
Differential Human Renal Tubular Responses to Dopamine Type 1 Receptor Stimulation Are Determined by Blood Pressure Status, 115
Kinetics
Adrenomedullary Secretion of Epinephrine Is Increased in Mild Essential Hypertension, 1303
Kinins
Angiotensin-(1-7) Augments Bradykinin-Induced Vasodilation by Competing With ACE and Releasing Nitric Oxide, 394
Kallikrein-Kinin System and Blood Pressure Sensitivity to Salt, 471
Knockout mice
Aberrant Renal Vascular Morphology and Renin Expression in Mutant Mice Lacking Angiotensin-Converting Enzyme, 216

L

L-arginine
Influence of Nitric Oxide and Angiotensin II on Renal Involvement in Hypertension, 188
Relationship Between Insulin Resistance and Endothelium-Dependent Vascular Relaxation in Patients With Essential Hypertension, 280
L-NAME
Calcitonin Gene–Related Peptide Is a Depressor in N^G-Nitro-L-Arginine Methyl Ester–Induced Hypertension During Pregnancy, 248
Influence of Nitric Oxide and Angiotensin II on Renal Involvement in Hypertension, 188
Temporal Influence of the Renal Nerves on Renal Excretory Function During Chronic Inhibition of Nitric Oxide Synthesis, 199
L-NMMA
Nifedipine Attenuates Systemic and Renal Vasoconstriction During Nitric Oxide Inhibition in Humans, 1192
Laser-Doppler flowmetry
Pressure Natriuresis and Autoregulation of Inner Medullary Blood Flow in Canine Kidney, 210
Pressure Natriuresis and Renal Medullary Blood Flow in Dogs, 1051
Letters to the editor
Estrogen Effects on Nitric Oxide Release, 1357
Estrogen Effects on Nitric Oxide Release. Response to the letter, 1357
Orthostatic Hypertension, 835

Nutrition
Nutrient Intake and Blood Pressure in the Dietary Intervention Study in Children, 930

O

Obesity
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171
Angiotensinogen Gene Variation Associated With Variation in Blood Pressure in Aboriginal Canadians, 1073
Left Ventricular Filling in Arterial Hypertension: Influence of Obesity and Hemodynamic and Structural Confounders, 544
Oligonucleotides, antisense
Dopamine D_{1A} Receptors and Renin Release in Rat Juxtaglomerular Cells, 962
Orthostatic hypotension
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828
Ouabain
Brain 'Ouabain' in the Median Preoptic Nucleus Mediates Sodium-Sensitive Hypertension in Spontaneously Hypertensive Rats, 599
Sodium Pump Isoform Specificity for the Digitalis-Like Factor Isolated From Human Peritoneal Dialysate, 815
Sympathoexcitatory Effect of Hypothalamic/ Hypophysary Inhibitory Factor in Rats, 1291
Oxidant stress
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366

P

P450 inhibitors
Inhibition of Renal Outer Medullary 20-HETE Production Produces Hypertension in Lewis Rats, 315
Patch-clamp techniques
Effects of Age on Ca^{2+} Currents in Small Mesenteric Artery Myocytes From Wistar-Kyoto and Spontaneously Hypertensive Rats, 1329
PD 123319
Angiotensin II Stimulates Secretion of Endogenous Ouabain From Bovine Adrenocortical Cells via Angiotensin Type 2 Receptors, 401
Sodium Intake, Angiotensin II Receptor Blockade, and Baroreflex Function in Conscious Rats, 450
Phenotype
Transfer of a Salt-Resistant Renin Allele Raises Blood Pressure in Dahl Salt-Sensitive Rats, 619
Pheochromocytoma
Tumor Recurrence and Hypertension Persistence After Successful Pheochromocytoma Operation, 1133
Phorbol ester
Expression of Guanylyl Cyclase-A/Atrial Natriuretic Peptide Receptor Blocks the Activation of Protein Kinase C in Vascular Smooth Muscle Cells: Role of cGMP and cGMP-Dependent Protein Kinase, 414
Phospholipase
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366
Phosphorylation
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366
Placebo effect
Placebo-Controlled Biofeedback Blood Pressure Effect in Hypertensive Humans, 1225
Placenta
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vasoconstriction in the Human Placenta, 796
Platelet-activating factor
Linkage Analysis Using Platelet-Activating Factor Ca^{2+} Response in Transformed Lymphoblasts, 158
Platelet-derived growth factor
Cholesterol Enhances Platelet-Derived Growth Factor-BB–Induced $[CA^{2+}]_i$ and DNA Synthesis in Rat Aortic Smooth Muscle Cells, 326
Dopamine D1–Like Receptor Stimulation Inhibits Hypertrophy Induced by Platelet-Derived Growth Factor in Cultured Rat Renal Vascular Smooth Muscle Cells, 350
Mitogen-Activated Protein Kinase Activation Is Involved in Platelet-Derived Growth Factor–Directed Migration by Vascular Smooth Muscle Cells, 334
Platelets
Cyclosporine Impairs the Ability of Human Platelets to Mediate Vasodilation, 1314
Plethysmography
Converting Enzyme Inhibitor Improves Forearm Reactive Hyperemia in Essential Hypertension, 286
Posture
Baroreflex Sensitivity Assessed by Complex Demodulation of Cardiovascular Variability, 1119
Potassium
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171
Reduced Dietary Potassium Reversibly Enhances Vasopressor Response to Stress in African Americans, 1083
Potassium channels
Regulation of Potassium Channels in Coronary Arterial Smooth Muscle by Endothelium-Derived Vasodilators, 262
Preeclampsia
Calcitonin Gene–Related Peptide Is a Depressor in N^G-Nitro-L-Arginine Methyl Ester–Induced Hypertension During Pregnancy, 248
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291
Preface
Proceedings of the Council for High Blood Pressure Research, 1996, 144
Pregnancy
Kidney 11β-HSD2 Is Inhibited by Glycyrrhetinic Acid-Like Factors in Human Urine, 500
Pregnancy-Induced Hypertension in Rats With Adriamycin Nephropathy Is Associated With an Inadequate Production of Nitric Oxide, 986
Preload reduction
Combined Sympathetic Suppression and Angiotensin-Converting Enzyme Inhibition in Congestive Heart Failure, 525
Primary aldosteronism
Increased Na^+-H^+ Exchange in Red Blood Cells of Patients With Primary Aldosteronism, 587
Prognosis
Prognostic Significance of the White Coat Effect, 1218
Prostacyclin
Regulation of Potassium Channels in Coronary Arterial Smooth Muscle by Endothelium-Derived Vasodilators, 262
Shear Stress Augments Expression of C-Type Natriuretic Peptide and Adrenomedullin, 1296
Prostaglandin E_2
Bradykinin B_2 Receptor Modulates Renal Prostaglandin E_2 and Nitric Oxide, 757
Protein kinase C
Expression of Guanylyl Cyclase-A/Atrial Natriuretic Peptide Receptor Blocks the Activation of Protein Kinase C in Vascular Smooth Muscle Cells: Role of cGMP and cGMP-Dependent Protein Kinase, 414
Proteinuria
Effects of Dietary Sodium and Magnesium on Cyclosporin A–Induced Hypertension and Nephrotoxicity in Spontaneously Hypertensive Rats, 822
Pulsatile compression
Pulsatile Compression of the Rostral Ventrolateral Medulla in Hypertension, 514

Pulse wave
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999

R

Race
Association of the Angiotensinogen Gene to Serum Angiotensinogen in Blacks and Whites, 1078
Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706
Reduced Dietary Potassium Reversibly Enhances Vasopressor Response to Stress in African Americans, 1083

Radioligand binding
Vascular Smooth Muscle Thromboxane A_2 Receptors Mediate Arachidonic Acid–Induced Sudden Death in Rabbits, 303

Ramipril
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478
Regulation of Growth of the Adrenal Gland in DOC-Salt Hypertension: Role of Angiotensin II Receptor Subtypes, 408

Rats
Calcification of Medial Elastic Fibers and Aortic Elasticity, 999
Effects of Enalapril, Losartan, and Verapamil on Blood Pressure and Glucose Metabolism in the Cohen-Rosenthal Diabetic Hypertensive Rat, 1260
Improvement in Baroreflex Function by an Oral Angiotensin Receptor Antagonist in Rats With Myocardial Infarction, 458
Induction of Growth Hormone Receptor and Insulin-Like Growth Factor-I mRNA in Aorta and Caval Vein During Hemodynamic Challenge, 123
Neonatal Angiotensin-Converting Enzyme Inhibition in the Rat Induces Persistent Abnormalities in Renal Function and Histology, 91
Nitric Oxide in Renal Cortex and Medulla: An In Vivo Microdialysis Study, 194
Pregnancy-Induced Hypertension in Rats With Adriamycin Nephropathy Is Associated With an Inadequate Production of Nitric Oxide, 986
Regulation of Growth of the Adrenal Gland in DOC-Salt Hypertension: Role of Angiotensin II Receptor Subtypes, 408
Role of Nitric Oxide in the Development of Vascular α_1-Adrenoreceptor Desensitization and Pressure Diuresis in Conscious Rats, 969
Structural and Functional Analysis of Small Arteries From Young Spontaneously Hypertensive Rats, 781

Rats, Dahl
Absence of Linkage for 'Endothelial' Nitric Oxide Synthase Locus to Blood Pressure in Dahl Rats, 49
Asymmetrical Dimethylarginine, an Endogenous Nitric Oxide Synthase Inhibitor, in Experimental Hypertension, 242
Link Among Nitric Oxide Synthase Activity, Endothelial Function, and Aortic and Ventricular Hypertrophy in Hypertension, 235

Rats, inbred SHR
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322
Amplification of Kinin-Induced Hypotension by Nitric Oxide Synthesis in Spontaneously Hypertensive Rats, 53
Asymmetrical Dimethylarginine, an Endogenous Nitric Oxide Synthase Inhibitor, in Experimental Hypertension, 242
Brain 'Ouabain' in the Median Preoptic Nucleus Mediates Sodium-Sensitive Hypertension in Spontaneously Hypertensive Rats, 599
Differential Central Modulation of the Baroreflex by Salt Loading in Normotensive and Spontaneously Hypertensive Rats, 808
Effects of Age on Ca^{2+} Currents in Small Mesenteric Artery Myocytes From Wistar-Kyoto and Spontaneously Hypertensive Rats, 1329
Effects of Chronic Arterial Hypertension on Constitutive and Induced Intercellular Adhesion Molecule-1 Expression In Vivo, 683
Effects of Dietary Sodium and Magnesium on Cyclosporin A–Induced Hypertension and Nephrotoxicity in Spontaneously Hypertensive Rats, 822
Enalapril and Losartan Reduced Cardiac Mass and Improved Coronary Hemodynamics in SHR, 519
Endothelin-1 Upregulation in the Kidney of Uninephrectomized Spontaneously Hypertensive Rats and Its Modification by the Angiotensin-Converting Enzyme Inhibitor Quinapril, 1178
Estrogen Maintains Nitric Oxide Synthesis in Arterioles of Female Hypertensive Rats, 1351
Increased Brain Transcription Factor Expression by Angiotensin in Genetic Hypertension, 592
Link Among Nitric Oxide Synthase Activity, Endothelial Function, and Aortic and Ventricular Hypertrophy in Hypertension, 235
Mechanical Stress of the Carotid Artery at the Early Phase of Spontaneous Hypertension in Rats, 992
Vascular Aldosterone in Genetically Hypertensive Rats, 45

Rats, inbred strains
Cardiopulmonary Baroreflex in NaCl-Induced Hypertension in Borderline Hypertensive Rats, 464
Role of the α-, β-, and γ-Subunits of Epithelial Sodium Channel in a Model of Polygenic Hypertension, 131

Rats, inbred WKY
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322
Differential Central Modulation of the Baroreflex by Salt Loading in Normotensive and Spontaneously Hypertensive Rats, 808
Role of the α-, β-, and γ-Subunits of Epithelial Sodium Channel in a Model of Polygenic Hypertension, 131

Rats, Sabra
Pressure Natriuresis in Salt-Sensitive and Salt-Resistant Sabra Rats, 1252

Rats, transgenic
Dose Effects of Human Renin in Rats Transgenic for Human Angiotensinogen, 1031
High Human Renin Hypertension in Transgenic Rats, 428
Pressure-Overload Deinduction of Human α_2 Na,K-ATPase Gene Expression in Transgenic Rats, 606

Receptor sequestration
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366

Receptor, angiotensin
Antisense Inhibition and Adeno-Associated Viral Vector Delivery for Reducing Hypertension, 177
Prolonged Reduction of High Blood Pressure With an In Vivo, Nonpathogenic, Adeno-Associated Viral Vector Delivery of AT_1-R mRNA Antisense, 374

Receptors NK-1
Role of Substance P in Blood Pressure Regulation in Salt-Dependent Experimental Hypertension, 506

Receptors, adrenergic
Effect of Mechanical Loading on Vascular α_{1D}- and α_{1B}-Adrenergic Receptor Expression, 1156
Lack of Correlation Between Arterial and Venous β-Adrenergic Receptor Sensitivity, 1273
Mechanical Load Opposes Angiotensin-Mediated Decrease in Vascular α_1-Adrenoceptors, 1165
Role of Nitric Oxide in the Development of Vascular α_1-Adrenoreceptor Desensitization and Pressure Diuresis in Conscious Rats, 969

Receptors, adrenergic, alpha-1
α_1-Adrenergic Receptor Antibodies in Patients With Primary Hypertension, 678

Receptors, adrenergic, beta
Cardiac β-Adrenoceptor–Mediated Signaling Pathway and Its Alterations in Hypertensive Heart Disease, 715
Receptors, angiotensin
Angiotensin II Enhances Baroreflex Control of Sympathetic Outflow in Heart Failure, 564
Receptors, angiotensin II
Dietary Salt Intake Modulates Angiotensin II Type 1 Receptor Gene Expression, 923
Distinct Mechanisms of Modulation of Angiotensin II Type I Receptor Gene Expression in Heart and Aorta, 1104
Regulation of Growth of the Adrenal Gland in DOC-Salt Hypertension: Role of Angiotensin II Receptor Subtypes, 408
Sodium Intake, Angiotensin II Receptor Blockade, and Baroreflex Function in Conscious Rats, 450
Receptors, atrial natriuretic factor
Thrombin Inhibits Atrial Natriuretic Peptide Receptor Activity in Cultured Bovine Endothelial Cells, 83
Receptors, bradykinin
FR 173657: A New, Potent, Nonpeptide Kinin B_2 Receptor Antagonist: An In Vitro Study, 951
Receptors, dopamine
Differential Human Renal Tubular Responses to Dopamine Type 1 Receptor Stimulation Are Determined by Blood Pressure Status, 115
Dopamine D_{1A} Receptors and Renin Release in Rat Juxtaglomerular Cells, 962
Receptors, mineralocorticoid
Vascular Aldosterone in Genetically Hypertensive Rats, 45
Recombinant adeno-associated virus (AAV) vector
Prolonged Reduction of High Blood Pressure With an In Vivo, Nonpathogenic, Adeno-Associated Viral Vector Delivery of AT_1-R mRNA Antisense, 374
Recurrence
Tumor Recurrence and Hypertension Persistence After Successful Pheochromocytoma Operation, 1133
Reflex
Baroreflex Impairment by Low Sodium Diet in Mild or Moderate Essential Hypertension, 802
Reflex, von Bezold–Jarisch
ANP Enhances Bradycardic Reflexes in Normotensive but Not Spontaneously Hypertensive Rats, 1126
Relaxation
Left Ventricular Filling in Arterial Hypertension: Influence of Obesity and Hemodynamic and Structural Confounders, 544
Remodeling
Differential Alteration in Vascular Structure of Resistance Arteries Isolated From the Cerebral and Mesenteric Vascular Beds of Transgenic [(m*Ren-2*)27], Hypertensive Rats, 1140
Renal autoregulation
Pressure Natriuresis and Autoregulation of Inner Medullary Blood Flow in Canine Kidney, 210
Renal blood flow
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222
Effect of High Salt Intake in Mutant Mice Lacking Bradykinin-B_2 Receptors, 483
Relationship Between Insulin Resistance and Endothelium-Dependent Vascular Relaxation in Patients With Essential Hypertension, 280
Role of Nitric Oxide in Modulating the Long-term Renal and Hypertensive Actions of Norepinephrine, 205
Renal disease
Achievement and Safety of a Low Blood Pressure Goal in Chronic Renal Disease: The Modification of Diet in Renal Disease Study Group, 641
Renal function
Transfer of a Salt-Resistant Renin Allele Raises Blood Pressure in Dahl Salt-Sensitive Rats, 619
Renal nerves
Temporal Influence of the Renal Nerves on Renal Excretory Function During Chronic Inhibition of Nitric Oxide Synthesis, 199
Renal vascular resistance
Effect of High Salt Intake in Mutant Mice Lacking Bradykinin-B_2 Receptors, 483
Renin
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Adrenomedullin Stimulates Renin Release and Renin mRNA in Mouse Juxtaglomerular Granular Cells, 1148
Angiotensin-Converting Enzyme Gene Mutations, Blood Pressures, and Cardiovascular Homeostasis, 150
Cyclooxygenase-2 Mediates Increased Renal Renin Content Induced by Low-Sodium Diet, 297
Dopamine D_{1A} Receptors and Renin Release in Rat Juxtaglomerular Cells, 962
Dose Effects of Human Renin in Rats Transgenic for Human Angiotensinogen, 1031
High Human Renin Hypertension in Transgenic Rats, 428
Induction of Renin in Medial Smooth Muscle Cells by Balloon Injury, 1044
Renin-Angiotensin System Components in the Interstitial Fluid of the Isolated Perfused Rat Heart: Local Production of Angiotensin I, 1240
Two-Kidney, One Clip and One-Kidney, One Clip Hypertension in Mice, 1025
Vascular Angiotensin-Converting Enzyme Expression Regulates Local Angiotensin II, 98
Renin-angiotensin system
Increased Brain Transcription Factor Expression by Angiotensin in Genetic Hypertension, 592
Neonatal Angiotensin-Converting Enzyme Inhibition in the Rat Induces Persistent Abnormalities in Renal Function and Histology, 91
Renal Immunocytochemical Distribution and Pharmacological Properties of the Dual Angiotensin II/AVP Receptor, 957
Renin gene
Aberrant Renal Vascular Morphology and Renin Expression in Mutant Mice Lacking Angiotensin-Converting Enzyme, 216
Transfer of a Salt-Resistant Renin Allele Raises Blood Pressure in Dahl Salt-Sensitive Rats, 619
Renin transgenic rat
Hypothalamic Substance P Release: Attenuated Angiotensin Responses in mRen2(27) Transgenic Rats, 510
Reserpine
Different Concepts in First-Line Treatment of Essential Hypertension: Comparison of a Low-Dose Reserpine-Thiazide Combination With Nitrendipine Monotherapy, 651
Resetting
Sympathoexcitatory Response to Cyclosporin A and Baroreflex Resetting, 576
Resistance arteries
Differential Alteration in Vascular Structure of Resistance Arteries Isolated From the Cerebral and Mesenteric Vascular Beds of Transgenic [(m*Ren-2*)27], Hypertensive Rats, 1140
Risk factors
High Prevalence of Concentric Remodeling in Elderly Individuals With Isolated Systolic Hypertension From a Population Survey, 539
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361
Left Ventricular Mass in the Elderly: The Cardiovascular Health Study, 1095
RNA, messenger
Vascular Aldosterone in Genetically Hypertensive Rats, 45
Rostral ventrolateral medulla
Pulsatile Compression of the Rostral Ventrolateral Medulla in Hypertension, 514
Ryanodine
Alterations in Calcium Stores in Aortic Myocytes From Spontaneously Hypertensive Rats, 1322

Senescent Heart Compared With Pressure Overload–Induced Hypertrophy, 15

S

Safety
Achievement and Safety of a Low Blood Pressure Goal in Chronic Renal Disease: The Modification of Diet in Renal Disease Study Group, 641
Safety and Feasibility of Dobutamine-Atropine Stress Testing in Hypertensive Patients, 1232
Serotonin
Cyclosporin A Increases Nitric Oxide Activity In Vivo, 570
Sewall Wright
Genetically Complex Cardiovascular Traits: Origins, Problems, and Potential Solutions, 145
Sex
Age-Related Changes in Total Arterial Capacitance From Birth to Maturity in a Normotensive Population, 1213
Sex steroids
Gonadal Hormones Modulate Deoxycorticosterone-Salt Hypertension in Male and Female Rats, 494
Sexual dysfunction
Long-term Effects on Sexual Function of Five Antihypertensive Drugs and Nutritional Hygienic Treatment in Hypertensive Men and Women: Treatment of Mild Hypertension Study (TOMHS), 8
Shear stress
Mechanical Stress of the Carotid Artery at the Early Phase of Spontaneous Hypertension in Rats, 992
SHRSP
Blockade of Bradykinin B_2 Receptors Prevents the Increase in Capillary Density Induced by Chronic Angiotensin-Converting Enzyme Inhibitor Treatment in Stroke-Prone Spontaneously Hypertensive Rats, 478
Signal transduction
α-Thrombin Stimulates *sis*-Inducing Factor-A DNA Binding Activity in Rat Aortic Smooth Muscle Cells, 356
A 90-kD Na^+-H^+ Exchanger Kinase Has Increased Activity in Spontaneously Hypertensive Rat Vascular Smooth Muscle Cells, 1265
Smoking
Neural Circulatory Responses to Carbon Monoxide in Healthy Humans, 1114
Smooth muscle cell
Smooth Muscle Apoptosis During Vascular Regression in Spontaneously Hypertensive Rats, 340
Smooth muscle cell migration
Mitogen-Activated Protein Kinase Activation Is Involved in Platelet-Derived Growth Factor–Directed Migration by Vascular Smooth Muscle Cells, 334
Sodium
Additive Effects of Losartan and Enalapril on Blood Pressure and Plasma Active Renin, 634
Age, Gender, and Non-modulation: A Sexual Dimorphism in Essential Hypertension, 980
Aging, Acculturation, Salt Intake, and Hypertension in the Kuna of Panama, 171

Effects of Alcohol on Sympathetic Activity, Hemodynamics, and Chemoreflex Sensitivity, 1278
Effects of Subfornical Organ Lesions on Sympathetic Nerve Responses to Insulin, 1020
Improvement in Baroreflex Function by an Oral Angiotensin Receptor Antagonist in Rats With Myocardial Infarction, 458
Metformin Inhibits Ganglionic Neurotransmission in Renal Nerves, 1173
Neural Circulatory Responses to Carbon Monoxide in Healthy Humans, 1114
Pulsatile Compression of the Rostral Ventrolateral Medulla in Hypertension, 514
Spontaneously Hypertensive Rat Y Chromosome Increases Indexes of Sympathetic Nervous System Activity, 613
Sympathoexcitatory Effect of Hypothalamic/ Hypophysary Inhibitory Factor in Rats, 1291
Temporal Influence of the Renal Nerves on Renal Excretory Function During Chronic Inhibition of Nitric Oxide Synthesis, 199
Synaptosomes
Hypothalamic Hypophyseal Inhibitory Factor (HHIF) Increases Intrasynaptosomal Free Calcium Concentration, 1337
Syncope
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828

T

Tachykinins
Role of Substance P in Blood Pressure Regulation in Salt-Dependent Experimental Hypertension, 506
Target organ damage
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361
Technology assessment, biomedical
Limited Echocardiography for Hypertensive Left Ventricular Hypertrophy, 560
Telomere
Reflections on Telomeres, Growth, Aging, and Essential Hypertension, 1067
Temocapril
Converting Enzyme Inhibitor Improves Forearm Reactive Hyperemia in Essential Hypertension, 286
Thapsigargin
Afferent and Efferent Arteriolar Vasoconstriction to Angiotensin II and Norepinephrine Involves Release of Ca^{2+} From Intracellular Stores, 222
Thrombin
α-Thrombin Stimulates *sis*-Inducing Factor-A DNA Binding Activity in Rat Aortic Smooth Muscle Cells, 356
Thrombin Inhibits Atrial Natriuretic Peptide Receptor Activity in Cultured Bovine Endothelial Cells, 83
Thromboxane
Thromboxane Is Required for Full Expression of Angiotensin Hypertension in Rats, 310
Thromboxane A_2
Vascular Smooth Muscle Thromboxane A_2 Receptors Mediate Arachidonic Acid–Induced Sudden Death in Rabbits, 303
Tilt
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828
Tissue, ultrasonic characterization
Ultrasonic Videodensitometric Analysis of Two Different Models of Left Ventricular Hypertrophy: Athlete's Heart and Hypertension, 937
Tobacco smoke pollution
Chronic Dietary L-Arginine Prevents Endothelial Dysfunction Secondary to Environmental Tobacco Smoke in Normocholesterolemic Rabbits, 1186
Trace elements
Nutrient Intake and Blood Pressure in the Dietary Intervention Study in Children, 930
Transcription, genetic
α-Thrombin Stimulates *sis*-Inducing Factor-A DNA Binding Activity in Rat Aortic Smooth Muscle Cells, 356
Increased Brain Transcription Factor Expression by Angiotensin in Genetic Hypertension, 592
Pressure-Overload Deinduction of Human α_2 Na,K-ATPase Gene Expression in Transgenic Rats, 606
Transforming growth factor
Characteristics of Diabetes, Blood Pressure, and Cardiac and Renal Complications in Otsuka Long-Evans Tokushima Fatty Rats, 728
Transgenic mice
Hypotension in Transgenic Mice Overexpressing Human Bradykinin B_2 Receptor, 488
Tumor necrosis factor-α
Effects of Chronic Arterial Hypertension on Constitutive and Induced Intercellular Adhesion Molecule-1 Expression In Vivo, 683
Twins
Angiotensin-Converting Enzyme and Angiotensinogen Gene Polymorphisms, Plasma Levels, Cardiac Dimensions: A Twin Study, 165
Tyrosine
Angiotensin II Signaling in Vascular Smooth Muscle: New Concepts, 366

U

U46619
Vascular Smooth Muscle Thromboxane A_2 Receptors Mediate Arachidonic Acid–Induced Sudden Death in Rabbits, 303
Ultrasonography
Intima-Media Thickness of the Carotid Artery in Hypertensive Subjects and Hypertrophic Cardiomyopathy Patients, 361
Time Course Changes of the Mechanical Properties of the Carotid Artery in Renal Hypertensive Rats, 1199
Ultrasonic Videodensitometric Analysis of Two Different Models of Left Ventricular Hypertrophy: Athlete's Heart and Hypertension, 937
Umbilical artery
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vasoconstriction in the Human Placenta, 796
Urine
Kidney 11β-HSD2 Is Inhibited by Glycyrrhetinic Acid-Like Factors in Human Urine, 500
Uterine contraction
Hypotension in Transgenic Mice Overexpressing Human Bradykinin B_2 Receptor, 488

V

Vagus nerve
Cardiopulmonary Baroreflex in NaCl-Induced Hypertension in Borderline Hypertensive Rats, 464
Vascular reactivity
Bovine Aortic Endothelial Cells Contain an Angiotensin-(1-7) Receptor, 388

Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706

Vascular resistance
Contrasting Autonomic and Hemodynamic Effects of Insulin in Healthy Elderly Versus Young Subjects, 700

Vasculature
Inhibition of 20-HETE Production Contributes to the Vascular Responses to Nitric Oxide, 320
Insulin and Insulin-Like Growth Factor in Normal and Pathological Cardiovascular Physiology, 691

Vasoconstriction
Cyclosporine Impairs the Ability of Human Platelets to Mediate Vasodilation, 1314

Vasoconstriction, postural
Calcium Channel Blockers Blunt Postural Cutaneous Vasoconstriction in Hypertensive Patients, 751

Vasodilation
Lack of Correlation Between Arterial and Venous β-Adrenergic Receptor Sensitivity, 1273
Mechanisms of Coronary Flow Reserve Impairment in Human Hypertension: An Integrated Approach by Transthoracic and Transesophageal Echocardiography, 551
Selective Guanylyl Cyclase Inhibitor Reverses Nitric Oxide–Induced Vasorelaxation, 254

Vasorelaxation
Effect of African-American Race and Hypertensive Left Ventricular Hypertrophy on Coronary Vascular Reactivity and Endothelial Function, 706

VCAM
Endothelial Adhesion Molecules and Leukocyte Integrins in Preeclamptic Patients, 291

Veins
Lack of Correlation Between Arterial and Venous β-Adrenergic Receptor Sensitivity, 1273

Ventricular function, left
Left Ventricular Mass in the Elderly: The Cardiovascular Health Study, 1095

Verapamil
Effect of Calcium Channel or β-Blockade on the Progression of Diabetic Nephropathy in African Americans, 744
Effects of Enalapril, Losartan, and Verapamil on Blood Pressure and Glucose Metabolism in the Cohen-Rosenthal Diabetic Hypertensive Rat, 1260

Vessels
Aberrant Renal Vascular Morphology and Renin Expression in Mutant Mice Lacking Angiotensin-Converting Enzyme, 216

W

Water-electrolyte balance
Renal Immunocytochemical Distribution and Pharmacological Properties of the Dual Angiotensin II/AVP Receptor, 957

Western blot analysis
Sodium Pump Isoform Specificity for the Digitalis-Like Factor Isolated From Human Peritoneal Dialysate, 815

X

Xanomeline
Effects of Central Muscarinic-1 Receptor Stimulation on Blood Pressure Regulation, 828

Y

Y chromosome
Spontaneously Hypertensive Rat Y Chromosome Increases Indexes of Sympathetic Nervous System Activity, 613

Z

Zinc
Increased Membrane Ratios of Metabolite to Precursor Fatty Acid in Essential Hypertension, 1058
